PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience in fintech applications, specializing in microservices architecture, REST APIs, and MS SQL Server. Experienced in developing and supporting secure payment processing systems handling 1000+ daily transactions for enterprise clients. Skilled in C#/.NET, SQL, CI/CD pipelines, production support, and secure backend application development.

SKILLS

- **Languages & Frameworks:** C#, SQL, C++, .NET, ASP.NET Core, Entity Framework Core
- **Backend Technologies:** Web API, REST APIs, Microservices, LINQ, Dependency Injection, Middleware
- **Database:** MS SQL Server (SSMS), Stored Procedures, Query Optimization, Indexing
- **Concepts:** OOP, DBMS, System Design
- **Tools & Practices:** Git, GitLab, Jira, ServiceNow, Agile (Scrum, Kanban, PI Planning), CI/CD, SSDLC, Fortify

Experience

FISERV

July 2023 – Present

Network Service Provider Platform

Chennai, India

- Managed and supported **10+** enterprise payment processing applications for merchant onboarding, billing, reporting, and settlement operations.
- Worked on payment processing systems handling **1000+** secure daily transactions for the merchant acquiring business.
- Developed and maintained REST APIs and backend services using **C#/.NET** and **MS SQL Server** for payment and merchant data management.
- Built cron-based microservices to automate scheduled client report generation, reducing manual operational effort by **30%**.
- Enhanced microservices architecture and backend processing to improve application scalability, performance, and reliability.
- Implemented a **CI/CD** pipelines using **GitLab**, **Docker**, and **Kubernetes** to automate build, testing, security scanning and deployment, reducing deployment time **50%**.
- Resolved security vulnerabilities using Fortify while following SSDLC and secure coding practices.
- Worked in **Agile (Scrum, Kanban, PI Planning)** teams, collaborating with cross-functional stakeholders.

EDUCATION

SHRI RAM INSTITUTE OF TECHNOLOGY, JABALPUR

2019–2023

B.Tech Computer Science

CGPA: 8.6

PROJECTS

SQL Script Automation

2025

- Developed an ASP.NET Core Web API to automate SQL script generation for business requests.
- Used predefined SQL templates to generate deployment scripts based on input parameters.
- Implemented database validation to verify existing data and generate SQL scripts for INSERT and UPDATE operations.
- Reduced manual SQL script creation by **70%** through automation.
- Improved deployment efficiency, data accuracy, and minimized manual errors.

ACHIEVEMENTS

- Earned the Microsoft Azure Fundamentals (**AZ-900**) **certification**.
- Solved 200+ DSA problems on GeeksforGeeks.
